Surface Preparation
Remove grease, dust and dirt by washing down with a liquid detergent and warm water followed by a rinse with clean water. Allow to dry. All loose, chalky, peeling and flaking material or rust must be removed with a scraper or wire brush. Sand the surface smooth and remove all dust. Sand glossy painted surfaces until all gloss removed. Fill holes and cracks with a suitable stopping compound. Sand lightly to an even finish.

Mould
After identifying the presence of mould, mildew or fungi, it is necessary to remove the growth then sterilize the surface before repainting.
